FOR IMMEDIATE RELEASE

### **New Literature from UV Resources Examines UV-C for Dental Offices**

SANTA CLARITA, CALIF. (DECEMBER 10, 2015) — UV Resources now offers literature examining the benefits of Ultraviolet Germicidal Irradiation in disinfecting air in dental offices and other healthcare facilities.

The UV-C wavelength can kill virtually all airborne viruses, bacteria and mold spores it encounters either through wall-mounted or central HVAC system-mounted light fixtures. Fewer microorganisms mean cleaner air, leading to health and energy-saving benefits.

To request a copy, please visit [www.uvresources.com](http://www.uvresources.com) or call (877) 884-4822.
