HVAC/R Installation Kit from UV Resources Streamlines Ultraviolet Lamp Fixture Mounting

SANTA CLARITA, CALIF. (FEB. 21, 2018) — The new UV-C Fixture Installation Kit from UV Resources provides extruded aluminum vertical supports designed to speed contractor installation of Ultraviolet Germicidal Lamps in HVAC/R systems.

Besides the framing supports, the kit includes everything needed to install UV lamp fixtures in an air handler plenum, including lamp holder bracket, ceiling gusset, self-tapping screws and hardware and leveling feet. For added installation flexibility, the two ~60-inch vertical supports can be “spliced” together to expand to accommodate plenums up to ~120 inches tall or cut for smaller applications. The installation kit can support multiple UV-C fixtures.

“The installation kit provides installers with everything they need to install UV-C fixtures,” says Dan Jones, president of UV Resources. “Installation time spent sourcing installation materials is therefore eliminated.”

ABOUT UV RESOURCES:

UV Resources (UVR) is a leader in the education, design and innovative engineering of affordable ultraviolet-C equipment for a variety of commercial, healthcare, government and residential HVACR applications. In addition to developing new and unique UV products for specific applications, UVR team members were among the first to properly apply UV energy in air conveyance systems of all types. UVR is an active member of ASHRAE, Illuminating Engineering Society (IES) and the International Ultraviolet Association (IUVA).
